Feros Djahani

Front-End Developer (Industrial Mechanic)

About Me

I am a German-speaking Front-End Developer with experience in building web apps with JavaScript & Angular. You can find my projects that including responsive websites and business apps in my public portfolio. I started my IT journey by coding small websites at home and watching other tutorials. During my current job as an industrial mechanic, I found that the part of work I enjoyed the most was always related to software. So I decided to amplify my IT knowledge and gain experience in web development. I am looking forward to building on my experience and starting my career in IT in a junior developer position.

Main Stack:

- JavaScript
- TypeScript, Angular
- HTML, CSS, Bootstrap

Side Stack:

- Git, APIs (REST), Google Firebase

Skills

- **Top Motivated:** During the Days in the Week I had to work on a full-time job and after a day at work I went to my computer to code at night and also through the weekends. I have a history of doing a good job, so if it gets hard or if it is no fun, I do not complain.
- **Building Applications with JavaScript & Angular:** I built landing pages and several web apps, as well as OOP-based Jump-and-Run-Games with the respective technologies.
- **Working in a Software Team:** During learning coding, I did several group projects where I learned how to develop a software project in a team.
- **High sense of responsibility:** I am used to taking responsibility and working diligently, as I always did in my job as an industrial mechanic.

Professional Experience

Young Capital / Telephone Account Manager

JAN 2022 - PRESENT, Home-Office

- Handling individual customer calls
- Responsibility for regular KPI-Report to management
